

KITCHEN GREASE FILTER MEASURING GUIDE

1. Use a good tape measure and **remove each frame from the hood.**
2. Measure all three dimensions in mm (millimetres) preferably, otherwise in inches.
3. Write down the sizes and count the quantities of each and be sure to measure all your kitchen grease filters (you never know; one might be a different size).
4. Contact us with the details recorded below:

KITCHEN GREASE FILTER MEASUREMENTS

	HEIGHT (MM)	WIDTH (MM)	DEPTH (MM)	QUANTITY
SIZE # 1				
SIZE # 2 (if applicable)				
TRACK (if applicable)*				
OTHER COMMENTS				

**If your frames are less than 50mm in depth (i.e. 25mm or 20mm or other), then please also measure the track:*

TRACK DEPTH MEASUREMENT PROCEDURE

Remove filter from hood and measure the track it normally sits in (see yellow arrows below)
